

The students are major stakeholders of the institutions. It is our primary duty to take care of our students those who are economically poor and meritorious. They should not be deprived of higher education. As our college is situated at the rural backward area, there are many students who come from very poor and economically backward families. They cannot meet out the expenditure of higher education. Such students need helping hands to support their education. Keeping in mind the crises of the poor and meritorious students we have developed "*Students Adoption Programme*". It consists of the alumni and faculty members of our college. They voluntarily provide financial assistance to the poor and meritorious students.
